SUMMARY

Mechanical engineer with 4 years of NPD and NPI experience in antenna and radar hardware. Owned eight products built from sheet metal, injection-molded and die-cast parts, with cost-down results (8% radome cost reduction, $0.3 per unit BOM saving), a fixture that lifted yield from 60% to 95%, and contract-manufacturer setup. Experienced in DFM/DFA, tolerance stack-up, snap-fit design, FEA and PLM-based design release.

EXPERIENCE

JMA Wireless — Hyderabad, India
Mechanical Engineer II May 2023 – Present

Product Design & DFM/DFA

- Designed pole, wall, ceiling, & tri-sector mounting brackets; gravity-assisted design **halved installation manpower**.
- Authored a **utility patent draft** for a snap-fit PCB/sheet-metal support pillar (twist-lock base, two-cavity mold).
- Introduced topology-optimized FDM 3D-printed prototypes, **cutting 60 g per unit** while meeting stiffness requirements.
- Drove **simulation-led design** (snap-fit, topology, FEA) for 3 molded parts & 1 FRP radome: **first-pass success**, ∼**$15K under budget**.

Product Development & NPI

- Owned end-to-end **NPD & NPI** for eight 5G Macro & Distributed Antenna Systems products for the US & Canada markets.
- Released RF PCB, sheet metal, die-cast, CNC, & EDM parts with a >**90% FAI pass rate**.
- Developed a **pneumatic pivot punching fixture** cutting a 2-person task to one operator & **raising yield from 60% to 95%**.
- Supported **contract manufacturing** setup in Chennai through BOM costing, tooling transfer, & operator training.
- Managed **ECRs, FAIs, & SVPRs** in Salesforce Propel **PLM** & SolidWorks **PDM** with the global team.
- Built RF PCB fixtures, press-pull tools, & alignment jigs: **40% less rework, 75% faster riveting**, 20–50 min saved per unit.

CAE & Validation

- Ran **non-linear FEA** of a production snap-fit: predicted 38 N insertion & 30 N removal force; flagged a fillet redesign.
- Built Excel-based **hand-calculation tools** for drag force, pneumatic crimping force, & plastic snap-joint behavior.
- Performed **harmonic & random vibration analyses** (80% first-pass test correlation, IEC 60068-2-6/64) & **IEC 60068-2-31 drop tests** for antenna qualification.
- Automated **Ansys Mechanical pre-processing** with Python/ACT scripts (meshing profiles, material assignment, midsurfacing, BCs, solver setup), **cutting setup time** ∼**2 hrs per job** & standardizing team models.

MulticoreWare India Pvt. Ltd. (Uhnder Team) — Chennai, India
Mechanical Design Engineer (R&D) Jul 2022 – Apr 2023

- Lowered radome **cost by 8%** through material optimization without degrading dielectric performance.
- Reverse-engineered & locally manufactured an RF waveguide connector, reducing cost by 8× compared to imports.
- Developed two automotive radar antenna chassis and radomes with **IP68 (IEC 60529)** ratings for ADAS applications.

MulticoreWare India Pvt. Ltd. (Uhnder Team) — Chennai, India
Mechanical Project Intern Mar 2022 – Jun 2022

- Implemented **snap-fit** radome design, reducing the radar BOM by two components and saving $0.3 per unit.
- Updated automotive radar housing designs based on lead engineer feedback & prepared GD&T-compliant drawings.
- Created company-wide central library in SolidWorks with 700+ frequently used fasteners, reducing design lead time.

EDUCATION

Bachelor of Engineering — Mechanical Engineering GPA: 8.21 / 10
Alagappa Chettiar College of Engineering and Technology (Anna University) 2018 – 2022

PROJECTS AND COMPETITIONS

SAE Bicycle Design Competition — 2020 - 2021 SAE INDIA
Developed a planetary gear-based bicycle drivetrain achieving 15% higher torque than a typical bicycle.

Prodigy Design Competition— May 2021 NIT Trichy
Designed a regenerative adhesive rolling-belt mechanism for water-body waste removal within a 24-hour time frame; delivered CAD models & documentation, securing runner-up position among 50 teams.

SKILLS & SOFTWARE

Design: SolidWorks, AutoCAD, Fusion 360, Inventor, Onshape, GD&T, Tolerance stackup, **DFM/DFA**, 3D Printing, snap-fit design
Simulation: Ansys Mechanical & Fluent, Finite Element Analysis, hand-calculation tools
Programming & Embedded systems: Python, MATLAB Simulink & Simscape, C, C++, Arduino
Other Tools: Excel, PowerPoint, PLM (Salesforce Propel), SolidWorks PDM, BOM costing, ECR/ECN
Management & Quality: RCA, Risk Mitigation, Feasibility Analysis, Cross-functional Team Coordination
