SUMMARY

Mechanical engineer with 4 years of NPD and NPI experience in structural analysis, vibration qualification and aerodynamic optimization of antenna and radar hardware. Ran static and non-linear structural analysis, harmonic and random vibration analysis (80% first-pass test correlation) and CFD on 135+ radome profiles, backed by hand-calculation tools. Experienced in lightweighting, GD&T drawings and PLM change control.

EXPERIENCE

JMA Wireless — Hyderabad, India
Mechanical Engineer II May 2023 – Present

- Executed **static structural analysis** with FOS targets of 1.5–3 (metals) & 2–5 (plastics).
- Performed **harmonic & random vibration analyses** with 80% first-pass correlation to physical tests (IEC 60068-2-6/64).
- Optimized radome aerodynamics with **Ansys Fluent CFD** (2D/3D): design of experiments on 135+ profiles achieved **12–18% wind load reduction**. Documented workflows for team adoption & working toward patent filing.
- Built Excel-based **hand-calculation tools** to estimate drag force from geometry, crimping force for pneumatic cylinder sizing, and snap-joint behavior in plastic part design.
- Applied **topology optimization** to lightweight FDM 3D-printed prototypes, **cutting 60 g per unit** while meeting stiffness requirements.
- Performed **IEC 60068-2-31 drop tests** for mechanical qualification of antenna products.
- Ran **non-linear (large-deformation) FEA** of a production snap-fit in Ansys Mechanical: predicted 38 N insertion and 30 N removal force and flagged a fillet redesign (FOS 1.13).
- Owned end-to-end **NPD & NPI** for eight 5G Macro & Distributed Antenna Systems products for the US & Canada markets.
- Released RF PCBs, sheet metal, injection-molded, die-cast, CNC, EDM, & FDM parts with a **90% FAI pass rate**.
- Controlled design changes (**ECRs, FAIs, & SVPRs**) through Salesforce Propel **PLM** & SolidWorks **PDM** with the global team.
- Supported **contract manufacturing** setup in Chennai through BOM costing, tooling transfer, & operator training.
- Developed a **pneumatic-actuated pivot punching fixture** that automated a 2-person task to one operator and **improved yield from 60% to 95%** (saving $0.4 per failed cycle).

MulticoreWare India Pvt. Ltd. (Uhnder Team) — Chennai, India
Mechanical Design Engineer (R&D) Jul 2022 – Apr 2023

- Developed two automotive radar antenna chassis and radomes with **IP68 (IEC 60529)** ratings for ADAS applications.
- Enhanced chassis thermal properties by refining fin geometry, reducing **internal temperature by 6°C**.
- Lowered radome **cost by 8%** through material optimization without degrading dielectric performance.

MulticoreWare India Pvt. Ltd. (Uhnder Team) — Chennai, India
Mechanical Project Intern Mar 2022 – Jun 2022

- Updated automotive radar housing designs based on lead engineer feedback & prepared GD&T-compliant drawings.
- Implemented **snap-fit** radome design, reducing the radar BOM by two components and saving $0.3 per unit.

EDUCATION

Bachelor of Engineering — Mechanical Engineering GPA: 8.21 / 10
Alagappa Chettiar College of Engineering and Technology (Anna University) 2018 – 2022

PROJECTS AND COMPETITIONS

Venturi Fan Blade Mechanism Patent in progress
CFD-validated ducted fan blade concept for secondary jet flow augmentation; patent filing in progress.

Drone Propeller Blade Design Personal project
Designed parametric propeller blades in multiple diameter/pitch variants from NACA/Eppler airfoil profiles.

FDM Subsonic Wind Tunnel Personal project
Designed and 3D-printed a functional subsonic wind tunnel for aerodynamic testing of 1:16 scale die-cast cars.

Non-conventional energy sources - Paper presented— Dec 2019 VCET, Madurai
Designed a roof-mounted micro-turbine array for vehicle-based wind energy harvesting, generating (5–8 W) at highway speeds.

SKILLS & SOFTWARE

Design: SolidWorks, AutoCAD, Fusion 360, Inventor, Onshape, GD&T, Tolerance stackup, 3D Printing
Simulation: Ansys Mechanical (static, non-linear, harmonic, random vibration), Ansys Fluent (CFD), FEA, topology optimization, hand-calculation tools (Excel), SolidWorks Simulation & Motion
Programming & Embedded systems: Python, MATLAB Simulink & Simscape, C, C++, Arduino
Other Tools: Excel, PowerPoint, PLM (Salesforce Propel), SolidWorks PDM
Standards & Testing: IEC 60068-2-6/-64/-31, IEC 60529 (IP68); test categories comparable to MIL-STD-810
