SUMMARY

Mechanical engineer with 4 years of NPD and NPI experience in antenna and radar hardware. Owned eight products built from sheet metal, injection-molded and die-cast parts, with cost-down results (8% radome cost reduction, $0.3 per unit BOM saving), a fixture that lifted yield from 60% to 95%, and contract-manufacturer setup. Experienced in DFM/DFA, tolerance stack-up, snap-fit design, FEA and PLM-based design release.

EXPERIENCE

JMA Wireless — Hyderabad, India
Mechanical Engineer II May 2023 – Present

- Owned end-to-end **NPD & NPI** for eight 5G Macro & Distributed Antenna Systems products for the US & Canada markets.
- Released RF PCBs, sheet metal, injection-molded, die-cast, CNC, EDM, & FDM parts with a **90% FAI pass rate**.
- Developed a **pneumatic-actuated pivot punching fixture** that automated a 2-person task to one operator and **improved yield from 60% to 95%** (saving $0.4 per failed cycle).
- Ran **non-linear (large-deformation) FEA** of a production snap-fit in Ansys Mechanical: predicted 38 N insertion and 30 N removal force and flagged a fillet redesign (FOS 1.13).
- Designed pole, wall, ceiling, & tri-sector mounting brackets; gravity-assisted design **halved installation manpower**.
- Supported **contract manufacturing** setup in Chennai through BOM costing, tooling transfer, & operator training.
- Built Excel-based **hand-calculation tools** to estimate drag force from geometry, crimping force for pneumatic cylinder sizing, and snap-joint behavior in plastic part design.
- Authored a **utility patent draft** for an injection-molded, snap-fit PCB/sheet-metal support pillar (twist-lock base, flexing offset arms, two-cavity mold).
- Executed **static structural analysis** with FOS targets of 1.5–3 (metals) & 2–5 (plastics).
- Performed **IEC 60068-2-31 drop tests** for mechanical qualification of antenna products.
- Performed **harmonic & random vibration analyses** with 80% first-pass correlation to physical tests (IEC 60068-2-6/64).
- Managed **ECRs, FAIs, & SVPRs** using Salesforce Propel **PLM** & SolidWorks **PDM** in coordination with the global team.
- Introduced topology-optimized FDM 3D-printed prototypes, **cutting 60 g per unit** while meeting stiffness requirements.
- Automation & process-improvement by developing RF PCB sub-assembly fixtures, rivet press-pull tools, & alignment jigs, achieving **40% rework reduction, 75% faster riveting, and cutting up to 20–50 mins per antenna** in the production line.

MulticoreWare India Pvt. Ltd. (Uhnder Team) — Chennai, India
Mechanical Design Engineer (R&D) Jul 2022 – Apr 2023

- Lowered radome **cost by 8%** through material optimization without degrading dielectric performance.
- Reverse-engineered & locally manufactured an RF waveguide connector, reducing cost by 8× compared to imports.
- Developed two automotive radar antenna chassis and radomes with **IP68 (IEC 60529)** ratings for ADAS applications.

MulticoreWare India Pvt. Ltd. (Uhnder Team) — Chennai, India
Mechanical Project Intern Mar 2022 – Jun 2022

- Implemented **snap-fit** radome design, reducing the radar BOM by two components and saving $0.3 per unit.
- Updated automotive radar housing designs based on lead engineer feedback & prepared GD&T-compliant drawings.
- Created company-wide central library in SolidWorks with 700+ frequently used fasteners, reducing design lead time.

EDUCATION

Bachelor of Engineering — Mechanical Engineering GPA: 8.21 / 10
Alagappa Chettiar College of Engineering and Technology (Anna University) 2018 – 2022

PROJECTS AND COMPETITIONS

Mini Trencher Design — APRIL/ MAY - 2021 3rd Year Project B.E.
Designed a low-cost mini agricultural trencher; reduced 5× cost & size through drivetrain & structure optimization.
SAE Bicycle Design Competition — 2020 - 2021 SAE INDIA
Developed a planetary gear-based bicycle drivetrain achieving 15% higher torque than a typical bicycle.
Prodigy Design Competition— May 2021 NIT Trichy
Designed a regenerative adhesive rolling-belt mechanism for water-body waste removal within a 24-hour time frame; delivered CAD models & documentation, securing runner-up position among 50 teams.

SKILLS & SOFTWARE

Design: SolidWorks, AutoCAD, Fusion 360, Inventor, Onshape, GD&T, Tolerance stackup, **DFM/DFA**, 3D Printing, injection molding, sheet metal & die-cast design, snap-fit design
Simulation: Ansys Mechanical & Fluent, Finite Element Analysis, SolidWorks Simulation & Motion Analysis, non-linear snap-fit analysis, hand-calculation tools
Programming & Embedded systems: Python, MATLAB Simulink & Simscape, C, C++, Arduino
Other Tools: Excel, PowerPoint, PLM (Salesforce Propel), SolidWorks PDM, BOM costing, ECR/ECN
